

NOTICE

Municipal Drive Trunk Sanitary Sewer, Village of Grand Bend September 2020

The Municipality of Lambton Shores has awarded a contract to Birnam Excavating Ltd. (General Contractor) for replacement of the trunk sanitary sewer along Municipal Drive from Ontario Street to Pump Station No. 2. Construction will involve deep excavation, replacement of the existing sanitary sewer and full restoration to match preconstruction condition. GM BluePlan Engineering Ltd. are the Engineers for the project. Construction is tentatively scheduled to commence in late September or early October, with completion by the end of 2020. A top coat of asphalt will be placed in 2021.

In advance of underground work, sub-contractor OZA Inspections, will be contacting each property owner or business within the project limits to schedule a brief pre-condition survey of the buildings as a precautionary measure. Your participation in this survey is optional and at your discretion.

Local traffic will generally have access to sections of the construction zone, and an emergency access route will be maintained at all times. Some sections may be inaccessible at times during construction. The General Contractor will make every effort to inform the public of specific disruptions.

Garbage and recycling should be set out for collection at the normal time and location. The General Contractor may need to carry your containers to the end of the construction area and return them if their operations are blocking access for the collection vehicle. Please mark your address on the bins.

Can you please email your representative's contact information to the Contract Administrator below. We will keep this information to provide you with any project updates or notifications as required.

We appreciate your patience, understanding and cooperation. If you have any questions or concerns, please contact:
